

**Eagle Scout's Project Benefits the Briones Archery Range: July 23 2015**

Prospective Eagle Scout, Daniel Elerding from Troop 401 in Pleasant Hill, selected the Briones Archery Club, located in Briones Regional Park, for his Eagle Scout Service Project. Daniel developed project plans to construct and replace five aging bow racks and to build three new benches for archers to rest on between targets. As a part of this project, Daniel had to develop detailed drawings and specifications for the work. He drafted a materials estimate and negotiated discount pricing from a local lumber company. He also recruited fellow boy scouts to assist with the construction and installation.

Daniel exhibited excellent leadership skills throughout the project, working well with Briones club officers and the other scouts assisting him. He demonstrated a maturity in leadership and organization well beyond his 17 years of age. The Briones Archers thank Daniel for his dedication to the project!

Ready to start.

Daniel recruits fellow scouts to participate in the manual labor.

Eagle Scout's Project Benefits the Briones Archery Range: July 23 2015

Setting the height on a new bench.

Positioning a new bow rack.

Checking vertical alignment.

Securing the new bow rack.

Testing the new bench.

All done!

Club officer Phil Myers thanks Daniel for a job well done.
